

February 12, 2019

(v.3.3.2 – AdmiQ)

- Fixed that for members having an account at my.iqniter.com, the belt and related profile data also can be edited from AdmiQ. It is required that the member, from my.iqniter.com, has enabled “Sharing data with the fitness facility”.

January 30, 2019

(v.3.3.2 – DesiQner and Cardio Training)

- Introduced Qpoints. The Qpoints achieved for a session can be max 100 and is calculated as:
Qpoints = Achieved Score / Max Score Per Session * 100.
- Qpoints per session and Totals calculated from February 1, 2019 are available from my.iqniter.com.
- Score and Qpoints is achievable only once for the same segment (step) of a session. Score and Qpoints are not achieved by jumping to a previous step and repeating it.
- Added options for using the previous Thumb-Up marker with score or the new flashing Thumb-Up. This option is enabled/disabled in the Score Setting menu.
- Added option for presenting Score or Qpoints on the Group Screen. This option is enabled/disabled in the Score Setting menu.
- Thumbs-Up are now shown after Work period in Tabata sessions.
- Added indication of own private sessions vs own shared sessions in Session Selection view.
- Fixed minor bugs. For instance, the bottom of the Exerciser Tile Names is not cut anymore.

January 20, 2019

(v.3.3.0 – Cardio Training and AdmiQ)

- Cardio Training and DesiQner has now support for Spotify® integration. You can play predefined iQniter Smart Sessions designed with Spotify® playlists, or you can design your own sessions with Spotify® tracks from your own playlists. Link to Spotify® is required and setup per user at my.iqniter.com.
- Added Playlist view to DesiQner.
- Added streaming of iQniter pre-session and iQniter post-session video (enable/disable in AdmiQ).
- Added video settings from the AdmiQ Advertisement view to the Cardio Training Settings view in admiQ, which enables the video settings can be set individually for Chain, Club and Studio/Zone.
- The Score feature has been updated to make the score achieved during a session comparable independent on session type (Heart Rate, Power or Tabata):
 - Maximum achievable points per session is 100, independent of the session duration and number of stages or steps.

- For Power and Tabata, the score is calculated continuously over the session. For Tabata, score is achieved during Work time, only. For Heart Rate, the score is achieved at the end of each step (as previous).
- The numbers have been removed from the 'Thumb-up' marker. The Thumb-up is shown at the end of each Step dependent on how well the Step was exercised:
 - Spot-on: Highest possible score achieved (flashing quickly)
 - Good: Close to highest possible score achieved (flashing slowly)
 - Fair: Can be improved (steady)
- Added the intensity color for current and next Step to the Cue Cards.
- The exerciser tile 'Hide' (F3) setting is not saved anymore (preventing wrong startup of Cardio Training).
- Minor bug-fixes.

November 11, 2018

(v.3.1.4 – Cardio Training)

- Fixed that video sometimes freeze in Cardio Training.
- Minimum FTP is now 50 and minimum HRmax is 120.
- Fixed other minor bugs.

September 09, 2018

(v.3.1.0 – All applications)

- Added Deviation Marker in Modern Exerciser Tile, which shows deviation from Target, and added setting for enabling/disabling Deviation Marker.
- Added Quick button for toggling Leaderboard on/off. Same as F9-key.
- Added more options for selecting Challenge Target
- Added settings for Video: 'Video Stretch Uniform to Fill'. When checked (default and as-is), the video fills the whole video area and is cropped if aspect ratio does not fit. When unchecked, the video is not cropped.
- Added Exerciser Emphasis option: The Exerciser background color is black instead of dark gray.
- Updated presentation of Test Protocols:
 - FTP Test: Average power and actual power during test. New and previous FTP after test.
 - MaxHR Test: Peak HR and actual HR during test. New and previous MaxHR after test.
- Optimized user interaction flow related to Video/Music. Now video and sound are toggled on/off independent of each other. If video is toggled off during a session with video, then video is automatically turned on when next stage with video starts.
- Optimized user interaction flow when running challenges and included challenge finishing state (5 sec).
- Bug Fixes:
 - Fixed that Cardio Training sometimes crashed when paring bike and exerciser.
 - Fixed show of Exerciser Position in modern Theme view

- FTP Test Start popup now also shows on the Group Screen
- The Step timer now counts down as default
- Corrected End-of-Session summary graphs
- Fixed that the DesiQner Login window did not always hide on Mac.
- Various minor fixes.

June 10, 2018

(v.3.0.0 – All applications)

- New Modern Skin in Cardio Training. Selection between Classic theme or Modern theme.
- Added video features: View video Front/Back and Mid/Full screen.
- Added Gamification features: Team Challenge and Sprint Challenge which can be run on-the-fly during sessions.
- Support for Polar OH1.
- Added FTP and HRmax tests.
- Added support for updating exerciser Nickname, HRmax and FTP from Instructor Panel and Equipment Selector as well.
- Support for showing %HR, %FTP and zone colors for bikes/equipment that is not paired with an iQniter belt.
- New Cardio Training settings:
 - Show/Hide equipment number
 - Show/Hide session profile in bottom of screen
 - Show/Hide session timer in bottom of screen
 - Enable/Disable text emphasis in exerciser tiles
 - Enable/Disable space between exerciser tiles
 - Adjustable time interval for switching values when Modern theme is selected
 - Adjustable time interval for switching summary values when session finished
- Login to AdmiQ is now mandatory. All AdmiQ users must sign-up to my.iqniter.com and subsequently be created as Club Administrator in AdmiQ in order to login to AdmiQ.
- Bug Fixes:
 - It is now possible to achieve 100 points from Tabata sessions.
 - Fixed auto-pairing with bikes
 - Fixed reverse Stage and Step timers do now work
