

We develop trendsetting training apps! Interested?

We are searching new colleagues - IT Developers

Job description

iQniter is expanding and we are looking for new colleagues to our IT development team. We develop new trendsetting apps. You will be working with the following tasks and be part of the iQniter team in close cooperation with consultants as well as partners and customers.

- Development of iQniter mobile app and studio apps with focus on web/frontends.
- Maintenance tasks and technical support including dialogue with customers to improve the product.

You have one or more of the following qualifications

- experience with IT development; preferable a Master in computer or IT engineering
- skills/experience with Microsoft tools (c#, ASP.Net, CSS and frontend tools)
- knowledge within Visual Studio/Xamarin development tools
- knowledge within AngularJS or similar

Besides, you

- like to work in teams, but can also work on your own
- quickly learn new stuff/tools
- understand to see the task from customer's side
- work structured, keep focus on quality and maintain overview when things are moving fast
- have good English skills

About iQniter

iQniter is an International growing company developing, marketing and selling software to the fitness industry. We are market leader in Norway and Denmark and have business relations with major international sports brands. We have distributors in more than 20 countries in Europe, Asia, America and Australia with main markets being Scandinavia, England and Germany. iQniter is located in Aalborg.

Interested? Please send application incl. CV to jan@iqniter.com
