Studio v3.7.0 (Cardio Training)

- Live Session tickets are not deleted on finish session (tickets are deleted on ticket expiration or on renewal)
- Added 'Refresh' button to Live Session tab
- Added check for Live Session already broadcasting
- Missing belt signal is now shown with an icon instead on group screen instead of a grayed-out exerciser tile.
- Added belt low battery indication in Modern view
- Added Club ID to Settings page
- Added option for unpairing bike in Exerciser dialog
- Bugfixes:
 - Now IQNITER HR belts automatically resume on group screen
 - Power/heart rate icons, exerciser position, cadence and intensity color are shown correctly in Next Step Information
 - Now exerciser tiles do not rearrange when Next Step Information is shown
 - Current Stage was cut on low resolution screens
 - Copy Streaming URL now works correctly for Live Sessions
 - Fixed bug in zone distribution graph of training report
 - Switch between Standard and Mixed layout does not change appearance of video
 - Now version number in Instructor panel is shown correctly
 - Updated settings can now be saved correctly

Equipment Selector v3.7.0

- Added option for unpairing bike in Bike Selection dialog.

AdmiQ v3.7.0

- Increased max number of Rental Belts to 150.
- Now Studio settings load correctly, including update of Exertion Scales
- Added Refresh button to Studio Settings view

DesiQner v3.7.0

- Removed mandatory DesiQner license for Mac
- Added support for toggling exerciser position (Standing, Free, Seated) by double click on the step top, middle, or bottom
- Bugfixes:
 - Added support for Mac OS 12.3 Monterey
 - Energy graphs are now calculated in background after load of session
 - Energy graphs now automatically updates when copying stages with music
